## Created Logos

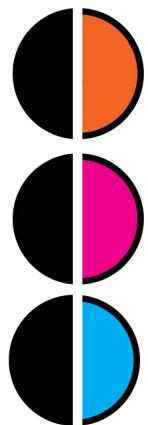

## Basic Description Layout for Home Page

The layout for this page begins with the background filling up the entire screen and being blurred out. Up above and down below will be black banners to keep a theme going with the layout of the site. Center of the page is the name of the focus and right below is the 3 tags that led to each rightful page, this is chose to quickly catch the viewers attention. The color of the tags can be changed during the creation process of the site at anytime.

## Example of Page title

### Example of paragraph header

Example of sub header if need

Paragraph that fulfills the rightful place will go right here below the two headers that are directed. If images are a definite requirement to be added, it will be to the right of the paragraph as shown on the below example on another section of sample information.

### Example of paragraph header

Example of sub header if need

If images are a definite requirement to be added, it will be to the right of the paragraph as shown in this example.
